## Use natural gas for your construction heat and save

NATURAL GAS FROM CONSUMERS ENERGY is less expensive than propane and can help reduce your construction heating cost by as much as 50 percent.

There's no doubt that natural gas is a lot of fuel for the money. But there's more:

- ▶ We offer a continuous supply of natural gas—no tanks to replace or refill
- ▶ Natural gas helps keep materials free of soot, residue and moisture
- ▶ With natural gas, there's no advance billing for the energy you use. You pay for what you use, after you use it

### Typical construction project heating costs

Figures are based on fuel charges only, and at the following rate: **Natural Gas**—49¢/CCF; **Propane**—\$1.15/Gallon; and/or an equivalent Btu requirement. These rates are subject to change.

## Natural gas from Consumers Energy is safe

Natural gas doesn't pool like propane. Therefore, you won't need to install costly and time-consuming fencing for safety reasons.

## Better for the work environment

Natural gas produces less carbon monoxide, reactive hydrocarbons, nitrous oxides, carbon dioxide and moisture, than any other fuel—your building frame and materials will be free from soot, residues and moisture produced by other fuels.

*Last year, contractors who used natural gas from Consumers Energy saved more than \$5 million in fuel costs compared to propane.*

## It's convenient

When you choose natural gas from Consumers Energy, you'll have a continuous supply of fuel and no need to worry about keeping your propane tanks filled or missed fuel deliveries.

## Plan early and save!

When planning your next project, let our experienced energy specialist show you how you can save up to 50 percent on construction heating costs. Call us today at **1-800-477-5050** to get more information on Construction Gas or to schedule an appointment.
