Customer Name	<input type="checkbox"/> G12 _____ Defined Interruptible Capacity kW
Service Location	Minimum 3,000 kW Interruptible Capacity
Customer Account Number	

Initial Term: _____ months beginning with the Effective Date of Agreement stated.

The Company agrees to supply and the Customer agrees to purchase electric energy in accordance with the Contract For Electric Service between Company and Customer dated _____ and the applicable Company's General Service Rate provision identified above, a copy of which is attached hereto and made a part hereof, and in accordance with such amendments thereto as may be filed with and approved by the Michigan Public Service Commission during the term of this Agreement.

Interruptible Service Provision – Market-Price Option (G12): The Customer must notify and contract with the Company by December 10th of each year of their desire to renew the G12 provision for the following capacity Midcontinent Independent System Operator, Inc. ("MISO") planning year and the contract term shall be designated as June 1 through May 31. The Customer shall not modify the Contracted Firm Capacity during the term of the contract as long as service is required, unless there is a Company verified and approved reduction in connected load. Capacity disconnected from service under this provision shall not be subsequently served under any other tariff during the term of this contract. Customer participation under the G12 Provision shall be based on the limitations, terms and eligibility as described in the Company's Electric Rate Book as approved by the Michigan Public Service Commission. Notice of renewal of participation in the G12 Provision by the Customer to the Company shall be made by email to EMAIL ADDRESS: ConsumersEnergy.DemandResponseProgram@cmsenergy.com PHONE and SMS: 800-500-6565 and 866-402-7267

The Customer's G12 Defined Interruptible Capacity shall be the amount of the customer's On-Peak Billing Demand at the time of the most recent annual MISO peak hour that exceeds the Customer's Firm Contract Capacity identified above in this Agreement. The minimum difference between the Customer's Firm Contract Capacity and the Customer's On-Peak Billing Demand required to participate in the G12 Provision is 3,000 kW and is subject to Company verification. Any load above the Customer's Firm Contract Capacity is designated as interruptible and is subject to MISO requirements for Load Modifying Resources and Company shall inform Customer of such MISO requirements. Interruption under this Provision may occur if MISO issues a Maximum Generation Emergency Event Step 2b order or NERC Emergency Event Alert 2 notice indicating that MISO is experiencing or expects to experience a shortage of economic resources and the Company has declared Emergency Status. Participation in the G12 Provision does not limit the Company's ability to implement emergency electrical procedures as described in the Company's Electric Rate Book including interruption of service as required to maintain system integrity.

With Customer approval, the Company may equip Customer facility with the System, which includes site devices owned by the Company that can enable direct load management, power metering, data collection, near real-time data communication, and internet-based monitoring. There shall be no cost to the Customer associated with the System equipment or installation of the System equipment. The

Company reserves the right to remove the System equipment if customer elects to discontinue participation in the G12 Interruptible Provision.

Notification: The Company shall provide Customer at least thirty (30) minutes advance notice of a required interruption in their electric service and, if possible, a second notice. The notice will be communicated by telephone to all numbers provided by the Customer as listed below. The Customer shall be informed, when possible, of the estimated duration of the interruption at the time of the notice. Customer shall confirm the receipt of such notice through the automated response process. Failure to acknowledge receipt of such notice shall not relieve the customer of the obligation for interruption under the G12 Provision.

Supporting Documents: See attached documents

- Contact Sheet – Contains customer notification contact information, web access and notification method detail.
- Energy Reduction Plan – Plan outlining actions to reduce load to achieve nominated interruptible capacity.

Subsequent Verification of System Integrity Interruption Order: The Company shall verify the amount of load disconnected or isolated from its electrical distribution system using MISO's approved measurement and verification ("M&V") protocols. During an interruptible event, the customer shall reduce all load down to the Firm Contract Capacity level within 30 minutes of receiving notice of a required interruption or have the total facility subject to interruption. The customer shall not exceed the Firm Contract Capacity level during the event period. The Company shall determine that the Customer complied with the interruption order if the Customer's actual kW load, measured in 15 minute intervals, is less than or equal to the Firm Contract Capacity or if the Customer's demand was Zero (0) kW for the duration for the interruption.

Cost of Customer Non Interruption: Failure of the Customer to comply with a system integrity interruption order of the Company shall be considered unauthorized use and billed at (i) the higher of the actual damages incurred by the Company or (ii) the rate of \$25.00 per kW for the highest 15-minute kW of demand in excess of Firm Contract Capacity created during the interruption period, in addition to the prescribed monthly rate. In addition, the Interruptible Capacity of a customer who does not interrupt within one hour following notice shall have the Firm Contract Capacity immediately increased (and G12 Defined Interruptible Capacity reduced) by the amount which the customer failed to interrupt, unless the customer demonstrates that failure to interrupt was beyond its control. Actual damages include (i) cost of energy provided to Customer during interruption period, and (ii) cost or value of capacity required to be provided to MISO resulting from participant's failure to perform.

At the Company's discretion and with advanced notice, the Customer may revise the Contracted Firm Capacity amount one time within the annual contracted period.

CONTACT LIST

Please **type** in the information below for a **MINIMUM of THREE** contacts. **Double click the check box and under "Default Values" click "Checked"**

During a load reduction event, Consumers Energy will contact the people in your facility who have been instructed on the implementation of your Energy Reduction Plan. **These notifications are automated and at least ONE contact is expected to respond to the message by pressing "1" to hear the message and then again pressing "1" to confirm receipt.**

Event alerts, warnings, enactments and all clear notifications will come to you from
