

Energy Efficiency Program Large Gas "Opt-In" Request

Date

The Consumers Energy Business Solutions Team
Attn: Large Gas Opt-Out Program
P.O. Box 1040
Okemos, MI 48805

Please consider this letter a formal request of Company/Corporation to "opt-in" to Consumers Energy's Energy Efficiency (EE) Program. The table below lists the accounts we have selected to voluntarily "opt-in" that are currently enrolled in the Large Gas Opt-Out Energy Efficiency Program. By "opting-in" the equipment served by these accounts will have access to the incentives and other benefits of the energy efficiency program available to other large business natural gas customers.

I am aware that Company/Corporation will receive the full energy optimization (EO) surcharge on its utility bill retroactive to January 1 of the current year and every month hereafter. I understand that this voluntary "opt-in" provision will remain in effect for the duration of the pilot program, including all periods of reauthorization thereafter or until such time that regulatory action might occur that could change circumstances and "opt-out" customers choosing to "opt-in" are no longer eligible to "opt-out".

I understand this is a two year pilot program subject to reauthorization by the Michigan Public Service Commission in Consumers Energy's next biennial review proceeding.
