Consumers Energy

Count on Us®

Whether you're going up north this summer, visiting the lakes or keeping it local, we can help you have greater peace of mind knowing your home is in good hands with a new smart thermostat.

A smart thermostat can be adjusted remotely from your favorite getaway spot or can auto-adjust to energy saving temperatures while you're away, helping you save money on your energy bill.

This month only, we are **increasing our Online Store instant rebate to \$75** for any smart thermostat, which you can pair with additional **summer sales** to save even more!
