# Say hello to the sunny days ahead.

While we can all take steps to reduce our carbon footprint through simple things like using less energy or recycling, most of us can't reduce it to zero on our own.

Subscribing to our community Solar Gardens offers you the opportunity to purchase 100% Michigan made energy without the up-front cost and maintenance of owning solar panels. It's an easy, affordable and sustainable way for you to be part of Michigan's clean energy future.

## How it Works

1. Subscribe to your desired number of ½ kW SolarBlocks.
2. We generate solar energy, 100% within Michigan.
3. You pay a subscription fee as little as \$8 on your monthly energy bill.
4. Your bill is credited for the solar energy actually produced.

## What is the Impact?

RES 488004 6/22 900K (269)

The 32,328,002 kWh generated by our Solar Gardens to date<sup>1</sup> equates to<sup>2</sup>:

- 378,826 Tree Seedlings Grown for 10 Years
- 57,578,088 Miles Driven by an Average Passenger Vehicle
- 7,793 Tons of Waste Recycled Instead of Landfilled

[1] Energy generated through December 31, 2021. [2] Equivalencies are a carbon dioxide equivalent based on EPA Greenhouse Gas Equivalency Calculator: Last Updated March 2021.
