A comfortable home makes all the difference

We realize the last few months may have been difficult. With summer here, you may be looking for ways you can save while keeping your home cool. Upgrading your room air conditioner or dehumidifier can help you avoid unexpected breakdowns and higher energy costs. We're here to help you make the switch by offering a **\$20 rebate**.*

ENERGY STAR certified room ACs are a great way to save on cooling costs. They use 10% less energy than standard room air conditioners, and some models can be controlled from your smart device.

ENERGY STAR certified dehumidifiers remove moisture from the air the same way standard models do, but use nearly 15% less energy. In fact, the annual energy savings could power a refrigerator for nearly two months!

Get \$20 back!

You work hard to keep your family and community safe, and making your entire home more efficient can be a big investment. That's why we offer a \$20 rebate* on all qualifying room air conditioners and dehumidifiers.

Visit ConsumersEnergy.com/appliance to learn more and apply for your rebate.

*This offer is valid for Consumers Energy residential electric and combination (natural gas and electric) customers only. Not valid for new home construction. No cash value.
