Save energy without sacrificing your comfort

The Smart Thermostat Program syncs to your thermostat to learn the settings that keep you comfortable. Occasionally, on really hot days when demand for energy is high, our smart technology will cool your home earlier in the day – based on your comfort preferences – to help conserve energy later on during peak hours.

But you're always in control and will be able to adjust your thermostat at any time, no matter what.

Visit **ConsumersEnergy.com/ecobee** or give us a call at **855-242-0558** with any questions.

Enroll today to claim your free thermostat and save up to 26%** annually on heating and cooling costs!

**Compared to a hold of 72°F/22°C. Visit ecobee.com/savings
