How it Works

Energy costs are different depending on the time of day. When you do tasks that use more energy – like washing dishes or running the dryer – on nights and weekends when others are using less energy, we're able to give you a discounted rate on that power.

3 Simple Steps to Start Saving

1. Enroll in the **Peak Rewards Time of Use** program to activate your potential for savings.
2. Shift energy use to nights or weekends when costs are lower.
3. Take advantage of select Energy Savings Days to earn \$0.95 directly for every kilowatt you reduce between 2 p.m. – 6 p.m. that day. There is no penalty if you don't participate.
