Our Clean Energy Plan at a Glance

90% Clean Energy Resources

550 megawatts of additional wind generation and 6,000 megawatts of solar energy will help us meet 90% of your energy needs with clean resources.

More Energy Solutions

Energy Efficiency programs, battery storage and creative energy management programs will save you energy and money.

Transition to Zero Coal

Coal plants will be retired, resulting in cleaner air and protecting the environment for our kids and grandkids.
