**PLEASE NOTE:**  
Your electrical system  
may vary from this  
illustration.

# YOURS and OURS

## IDENTIFYING YOUR ELECTRICAL SYSTEM

### You own and are responsible for maintaining:

If any of the following are damaged, Consumers Energy cannot restore power until necessary repairs have been performed to your electrical equipment:

- **Point of attachment** – anything that anchors the service drop to your building.
- **Service entrance cable/pipe** – your wire, or pipe that carries the wire, running along the outside of your building to our meter and from the meter to your service panel or fuse box.
- **Service panel or fuse box** – including your circuit breakers or fuses and all wiring in your building.

Repairs should be performed by a licensed electrician.

### Consumers Energy owns, maintains and repairs:

- ① **Service Drop** – our wire that delivers electricity to your building.
- ② **Attachment device** – used to secure our wire to your mast or other point of attachment.
- ③ **Connectors** – used to make the connection between our wire and your wire.
- ④ **Meter** – our device that measures your energy use.
- ⑤ **Meter base/socket** – our metal box that houses the meter (customer is responsible for installation).

To report damages to **our** system or for any questions, call us at: **(800) 477-5050**.
