Natural Gas Facts

Natural gas is located underground. Natural gas is refined in a processing plant and then put into storage. Natural gas goes through the city gate. This is an important step because a chemical is added to make the gas smell. This is how we can tell if natural gas is leaking!

Word Bank:

storage

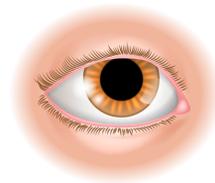

underground

leaking

Draw a picture of something that runs on natural gas in your home.

Natural Gas Safety

We **CAN'T** see natural gas.

We **CAN'T** touch natural gas.

We **CAN'T** taste natural gas.

But we can **SMELL** natural gas!

What does it smell like?

Rotten eggs .

If you smell natural gas...

1

Tell an adult!

2

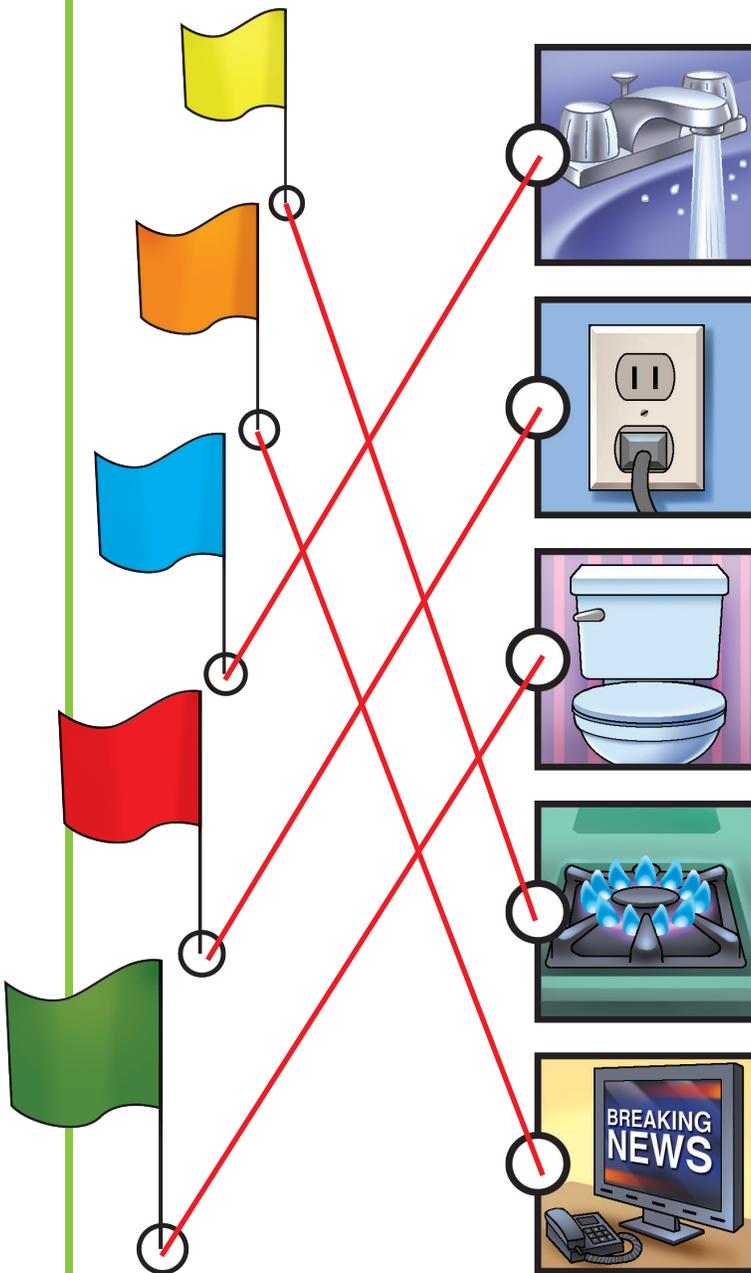

Get out!

3

Call for help

Respect the Flags

Flags are used to mark pipes and wires that are buried underground. Draw a line from the flag to the correct utility.

Before starting a digging project, you should always call

Miss Dig at 811

Know what's below.
Call before you dig.
