

Explore an Energy Source

Directions: Visit <http://www.eia.doe.gov/kids/energyfacts/index.html>. Click on 'Energy Sources' on the right-hand side. Pick one unfamiliar source, and click on the name to learn more about it. Then, answer the questions below.

A. What source did you pick?

B. Is this a non-renewable or a renewable source of energy?

C. Where does this source come from? Is this source available everywhere? If not, where is this source found?

D. Explain the process of how electricity is generated from this source.

E. How does this source affect the environment?

F. List two other interesting facts that you learned about this source of energy.

1.

2.

Feel free to explore the other sources of energy!
