

## **MONTHLY PROGRESS UPDATE #17 MANISTEE, MI FORMER MGP SITE**

### **Work completed between 04/01/2020 and 04/30/2020 included the following:**

- Began mobilizing personnel, equipment, and supplies for 2020 construction activities.
- Completed installation of additional sedimentation controls and performed inspections in accordance with the Soil Erosion and Sedimentation Control permit.
- Completed construction of additional access roads and staging pads to support sediment removal activities (see Photo No. 1, No. 2, and No. 3).

### **Upcoming work includes the following:**

- Complete mobilizing personnel, equipment, and supplies for 2020 construction activities.
- Begin construction and perimeter air monitoring.
- Begin turbidity monitoring during in-river work.
- Begin in-river sediment dredging.
- Begin post-removal confirmation observations.
- Continue inspections of the installed sedimentation controls.
- Begin transportation and disposal of dewatered sediment to the project landfill.
