

EV Charging Station Rebates

PowerMIDrive™ is a program designed to get more electric vehicles on the roads. Whether it's building new infrastructure or encouraging smarter charging practices, we're leading Michigan's clean transportation.

If you drive an electric vehicle or run a business that will offer charging stations, the **PowerMIDrive™** program may have a rebate for you.

\$500 for customers installing an approved Level 2 Charger at their residence.

Additional savings are available to low-income customers.

Up to \$5,000 for commercial customers installing a public Level 2 Charger.

Total number of rebates available is limited.

Up to \$70,000 for commercial customers installing a public DC Fast Charger.

Total number of rebates available is limited.

Convenient Charging

Charging can be done anywhere there is an outlet. While many electric vehicle owners charge at home or work, public charging offers convenient, fast charging when your commute exceeds the range of your vehicle.

The number of public charging stations continues to increase rapidly, making owning an electric vehicle a great choice, no matter your lifestyle.

Benefits for Your Wallet & Environment

Annual Savings

Fuel cost to drive an electric vehicle is 40-50% less, dependent on the current price of gasoline.

Tax Incentives

To offset the upfront costs of an electric vehicle, some customers may be eligible for Federal Tax Incentives up to \$7,500.

Cleaner Electricity

We're moving to change the way we generate electricity. Our plan is to eliminate the use of coal by 2025 and reduce carbon emissions by 90% by 2040.

Fewer Emissions

Unlike gasoline vehicles, electric vehicles don't have a tailpipe and don't produce direct emissions like carbon dioxide.

Energy Programs

You can subscribe to renewable energy to make your power source even more sustainable and help us eliminate the impact of carbon emissions by participating in our Solar Gardens program.

Consistent Price

Unlike the price of gasoline, the price of electricity is set by the State of Michigan. Our electric vehicle rates reward EV drivers for charging their vehicles during off-peak hours (midnight - 2 p.m. & 7 p.m. - midnight).
