

Greenhouse Gas Policy

Consumers Energy has had a long history of providing safe, reliable, affordable and increasingly clean energy to Michigan residents. To achieve a balanced generation portfolio while reducing our greenhouse gas (GHG) emissions we will:

- Comply with all GHG laws and regulations
- Increase clean energy in our generation fleet when reliable and economic
- Engage with peers to share best practices
- Support the development of new GHG reducing technology through participation in utility research groups
- Maintain a procedure to engage with appropriate stakeholders when implementing new generation projects to identify and reduce GHG emissions
- Set and obtain goals to reduce our GHG emissions
- Communicate this policy to interested stakeholders
