

Water Management Policy

Consumers Energy

Count on Us[®]

Our Commitment to Protect and Preserve Water

Water is a vital resource for our operations and is a plentiful resource, which makes Michigan unique as a state. Consumers Energy recognizes the importance of our Great Lakes system and strives to protect its abundance and quality. To do this, we will:

- Comply with all water use and water quality laws and regulations
- Maintain a team to identify and implement water-reducing activities where and when feasible
- Set water-intensity reduction goals
- Track and report water usage as appropriate
- Encourage project design alternatives that use less water during our decision-making processes
- Assure adequate resources are available to identify and reduce water-intensity usage
- Communicate this policy to interested stakeholders
